

Mini Hardbook SoftPLC™ Processor

Cat. No. HB-MOLEH-x, HB2-MILEH-x

General Description

Hardbook SoftPLC's are open architecture controller CPU's that can connect to a wide variety of I/O and communication networks. Hardbook SoftPLC's are customized at the factory to application specific configurations and include hardware assembly, driver installation, system software configuration, and system level testing.

Hardbook SoftPLC models differ only in the discrete I/O capacity (see table). Analog or special purpose module I/O channels allowed are limited only by the selected hardware, not the SoftPLC.

The HB-MOLEH-x and HB2-MILEH-x are designed to be safely operated in hazardous locations, such as those with flammable gases, combustible dust, or ignitable fibers, where there is a potential for fire and explosions. They are UL listed for Class 1 Division 2 Groups A, B, C, D T3A.
