

PLC-2 Programming Station

Model TD2-PS

General Description

This ruggedized portable station includes TOPDOC PLC-2 programming, documentation and troubleshooting software to allow you to effectively maintain your PLC-2 systems. Also included is our custom 16 foot cable (*Cat No TD2-CAM*) that connects the Programming Station's serial port directly to the PLC-2 front port.

Online monitoring, programming, forcing, upload/download are supported, as well as offline programming, documentation, and reporting.

When you don't need to run TOPDOC PLC-2, the system can be booted into Windows7/8 to run other software.
