We provide

[Industrial Automation Products](#)

*PAC/PLC's, SCADA/HMI,
Remote Access & RTU's,
Protocol Gateways,
A-B Migrations/Upgrades*

Learn more about industrial IoT . . .

The IoT (*Internet of Things*), also referred to as M2M (*Machine to Machine*), is currently a hot topic in industrial automation.

As a leading provider in this market with our [TagWell](#) powerful, low-cost remote asset management platform, we are pleased to provide the following informational resources:

- [M2M & IoT Technologies Overview](#) (~13 min video) -Definitions of IoT terminology and technologies, benefits and considerations of cloud computing in M2M applications. *(Excerpted from a longer webinar.)*
- [TagWell Platform](#) (~24 min video) - Details of the TagWell cloud platform functions, features, communication optimizations, application examples, [Web Studio](#) TagWell Driver and more. *(Excerpted from a longer webinar.)*
- [Clipboards are out! Protocol Gateways help make IoT efficient, accurate and low cost.](#) *(Originally published in "Industrial Embedded Systems" June, 2015.)* - Gateways are a key component in moving data to the cloud efficiently. This article describes different gateway and industrial communications products and strategies.
- [Easy & Inexpensive Remote Systems Management.](#) This white paper uses application examples to illustrate how to achieve flexible, low cost, easily implemented solutions for remote data acquisition and control.

About [TagWell](#)

SoftPLC Corporation's TagWell solution provides a powerful and configurable platform for comprehensive and scalable remote control system management.

TagWell maximizes the benefits of Internet cloud technologies and low-cost M2M

cellular communications. Combined with our field-proven industrial controller and communications gateway products, TagWell makes it easy to monitor, control, acquire data from, and troubleshoot remote systems, machines, and other devices via Internet connections.
